AWARENESS ON VERMICOMPOST

On 25-02-2022, the NSS unit is organised a program Awareness on Vermi-compost in our Dr. C. S. N. Degree & P.G college. Mrs. P. Sunitha Garu is explained the vermi-composting process, earthworms play an important role in converting biodegradable organic matter into high quality manure. Earthworm gut microorganisms produce exo-enzymes that help to degrade organic matter into forms of nutrients that are available for plant growth. Earthworms are valued by farmers because, in addition to aerating the soil, they digest organic matter and produce castings that are a valuable source of humus.
