HYGIENE AND HAND WASH AWARENESS

On 04-06-2018, a program on Hygiene and Hand Wash Awareness has been conducted in ZPHS, Mogallu. Mrs.V. Lavanya Garu has supervised the program conducted for the students. She also explained the importance of hygiene and created awareness on the diseases acquired if hands are not washed for the students. Washing your hands properly is one of the most important things you can do to help prevent and control the spread of many illnesses. Good hand hygiene will reduce the risk of things like flu, food poisoning and healthcare associated infections being passed from person to person. Hands normally carry lots of germs and should be washed:

After visiting the toilet

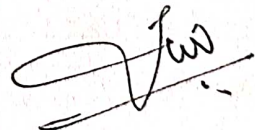

Before handling food

When visibly dirty

After coughing or sneezing into your hands

Washing your hands regularly will help to stop the coronavirus from virus spreading.
