ROAD SAFETY HELMET AWARENESS

On 11-10-2018 a program on road safety helmet awareness was conducted near BVRAJU statue by M.Gopal garu. Samuel garu and our students had participated in the program. He explained that safe, quality helmets reduce the risk of death in a road crash by over six times, and reduce the risk of brain injury by up to 74%. Head trauma is the leading cause of death for riders, and motorcycles continue to proliferate rapidly. Yet the use of helmets in many low and middle-income countries remains low. Road safety is very important for people of all age group to be safe and secure as well as reduce the number of road accidents and injury cases. So, everyone should strictly follow all the rules, regulations and signs of road traffic lights. Most of the impact energy is absorbed by the helmet, rather than your head and brain. But just as important as wearing a helmet is wearing the right helmet.
