AIDS AWARENESS PROGRAM

On 07-10-2019, a program was organized on AIDS Awareness Program in Government Hospital, Bhimavaram. G. Thomas Garu has conducted the awareness program for the students. He brought awareness about AIDS and how to prevent it, in the students in the presence and help of the Government doctors. There are three main reasons for AIDS education, the first of which is to prevent new infections from taking place. Giving people information about HIV – what HIV and AIDS are, how they are transmitted, and how people can protect themselves from infection. Teaching people how to put this information to use and act on it practically – how to get and use condoms, how to suggest and practice safer sex, how to prevent infection in a medical environment or when injecting drugs. Second reason that AIDS education is needed is to improve quality of life for HIV positive people. Too often, AIDS education is seen as being something which should be targeted only at people who are not infected with HIV in order to prevent them from becoming infected. The third reason people need AIDS education is to reduce stigma and discrimination. In many countries there is a great deal of fear and stigmatization of people who are HIV positive. This fear is too often accompanied by ignorance, resentment and ultimately, anger.
