Mrs. Dr. G. Sudha Sri Purna, gave a Seminar on “ **RESEARCH METHODOLOGY & STATSTICAL ANALYSIS** ” on 21st February 2023 to the students of **Life Sciences**. She explained how Statistical methods involved in carrying out a study include planning, designing, collecting data, analyzing, drawing meaningful interpretation and reporting of the research findings. The statistical analysis gives meaning to the meaningless numbers, thereby breathing life into a lifeless data. It involves studying the methods used in your field and the theories or principles behind them, in order to develop an approach that matches your objectives. Methods are the specific tools and procedures you use to collect and analyze data (for example, experiments, surveys, and statistical tests). Statistical analysis is the process of collecting and analyzing data in order to discern patterns and trends. It is a method for removing bias from evaluating data by employing numerical analysis.

Event Co-ordinator	Mr. B. Prabhakar Rao

Mr. R. Nagendra Babu, gave a Seminar on “ **FINANCIAL DERIVATIVES**” on 17th October 2022 to the students of Commerce & Management Studies students. He explained what Financial derivatives are financial instruments that are linked to a specific financial instrument or indicator or commodity, and through which specific financial risks can be traded in financial markets in their own right. In finance, there are four basic types of derivatives: forward contracts, futures, swaps, and options.

Basically, we can compute the derivative of $f(x)$ using the limit definition of derivatives with the following steps:

- Find $f(x + h)$.
- Plug $f(x + h)$, $f(x)$, and h into the limit definition of a derivative.
- Simplify the difference quotient.
- Take the limit, as h approaches 0, of the simplified difference quotient.

Mrs. Ch. K. L. Prasanna, gave a Seminar on “ INTELLECTUAL PROPERTY RIGHTS ” on 11th July 2022 to the students of Commerce & Management Studies. She explained how Intellectual property rights include patents, copyright, industrial design rights, trademarks, plant variety rights, trade dress, geographical indications, and in some jurisdictions trade secrets. IP rights incentivize entrepreneurs to keep pushing for new advances in the face of adversity. IP rights facilitate the free flow of information by sharing the protected know-how critical to the original, patented invention. In turn, this process leads to new innovations and improvements on existing ones. In India, there are 7 types of intellectual property rights, namely – copyright, trademarks, patents, geographical indications, plant varieties, industrial designs and semiconductor integrated circuit layout designs.

ACADEMIC YEAR 2021 – 2022

SEMINAR

Details of the Workshop conducted :-

Name of the Event	Seminar
Resource Person	Mr. Srinivas
Topic	Tips for writing technical research paper
Date	28-04-2022
Time	10:00 A.M
Mode of Conduction	Offline
Participants	Computer Science Students
Conducted by	Department of Computer Science
Event Co-ordinator	P.Durga Prasad

Mr.Srinivas gave a seminar on “**Tips for writing technical research paper**” on **28th April 2022** to the students of **Computer Science**. He explained how to make the organization and results clear. A paper should communicate the main ideas of your research (such as the techniques and results) early and clearly. Then the body of the paper can expand on these points; a reader who understands the structure and big ideas can better appreciate the details.

Mr. U. R. K. Raju, gave a Seminar on “ **DIFFERENT ANALYTICAL TECHNIQUES** ” on 29th July 2021 to the students of **Life Sciences** Students. He discussed about different analytical techniques like X-Ray Fluorescence technique, GC, HPLC, partition, adsorption, GLC and GSC, etc. He explained about the applications of these techniques. He explained that the XRF is used to determine the elemental composition of inorganic based materials. It is used for bulk chemical analysis on solids and powders. X-rays when they fall on the sample they emit fluorescent X-ray which is characteristic for those elements. He also explained about LCMS and GCMS also and their importance in research and pharmaceutical industry.

Mr. M. Appa Rao, gave a Seminar on “EMERGING TRENDS IN IPR REGIME” on 04th March 2020 to the students of Humanities. He explains that AI and ML are among the most prominent emerging technologies that will impact IPR in India. With the emergence of AI-enabled machines, there is an impetus to redefine existing IP protection laws to make them more stringent. It is safe to say that in recent times of globally highly digital landscape, Intellectual Property Rights are most essential than it has ever been. IPR has given worth to the ideas and has made them commercially potential. Without taking adequate measures to protect one's invention or business, the individual can never reap the benefits of their hard-work.

Mr. B. Prabhakar Rao, gave a Seminar on “INTERFACE BETWEEN IPR COMPETITION LAW” on 05th February 2020 to the students of Life Sciences. He explains that both bodies of law share the same basic objective of promoting consumer welfare and an efficient allocation of resources. IPR promotes dynamic competition by encouraging undertakings to invest in developing new or improved products and processes. So does competition by putting pressure on undertakings to innovate.

Mr. K. Bangarraju, gave a Workshop on "ENTREPRENEURSHIP " on 26th September 2019 to the students of Commerce & Management Sciences. He explained the Entrepreneurship is the process of creating, developing, and managing a new business venture with the aim of generating profits or creating value. An entrepreneur is an individual who takes on financial risks to start and grow a business, using innovative ideas and strategies to capitalize on market opportunities. Essentially, entrepreneurship development is the process of developing the skill set and knowledge of entrepreneurs. This accomplishment is through a variety of approaches, such as classroom sessions or training programs specifically geared to improve entrepreneurial skills.

Dr. G. Sudha Sri Purna, gave a Seminar on "AWARENESS ON PUBLICATION" on 05th August 2019 to the students of Humanities. She explains One of the cornerstones of academia is archival journal publication. Publishing provides a communication channel for researchers within a field, a repository of important research efforts and a recognition mechanism for researchers and institutions a like to maximize your publication output and citation rate you need to:

1. Know why you're trying to get published.
2. Choose broader projects.
3. Choose the right journals.
4. Communicate with journal editors to get published sooner.
5. Build relationships and collaborate.

Dr. A. V. Satyanarayana, gave a Seminar on “**Research Fund for oppurtunities**” on 06th May 2019 to the students of **Chemistry**. He explained how Research funding is defined as a grant obtained for conducting scientific research generally through a competitive process. To apply for grants and securing research funding is an essential part of conducting Research. If you are affiliated with a college or university, contact your department office. Some colleges and universities have an office for sponsored programs, which coordinates grant requests and helps researchers with finding grant opportunities. Also ask your peers and colleagues about funding sources.

N. Ravi Kumar, gave a Seminar on “Entrepreneurship” on 05th April 2019 to the students of Chemistry. He explained the Entrepreneurship is the process of creating, developing, and managing a new business venture with the aim of generating profits or creating value. An entrepreneur is an individual who takes on financial risks to start and grow a business, using innovative ideas and strategies to capitalize on market opportunities. Essentially, entrepreneurship development is the process of developing the skill set and knowledge of entrepreneurs. This accomplishment is through a variety of approaches, such as classroom sessions or training programs specifically geared to improve entrepreneurial skills.

S. Teki, gave a Seminar on “ Inculcating the research in students ” on 28th March 2019 to the students of Humanities. He tells about the educational journey of research helps students learn all about current discussions. Developing essential library skills is a huge benefit to becoming self-sufficient. Thus, research aids in evaluating other writing styles and improving one's reading and writing skills. Research allows you to pursue your interests, to learn something new, to hone your problem-solving skills and to challenge yourself in new ways. Working on a faculty-initiated research project gives you the opportunity work closely with a mentor – a faculty member or other experienced researcher.

Dr. Venu Reddy, gave a Seminar on "INTELLECTUAL PROPERTY RIGHTS" on 21st August 2018 to the students of Commerce & Management Sciences. He explained the primary function of intellectual property rights (IPRs) is to protect and stimulate the development and distribution of new products and the provision of new services based on the creation and exploitation of inventions, trademarks, designs, creative content or other intangible assets. Intellectual property rights are the rights given to persons over the creations of their minds. They usually give the creator an exclusive right over the use of his/her creation for a certain period of time. Introduction of intellectual property rights is a basic guide to the legal rights of individuals or organizations that own intellectual property (IP). Intellectual property refers to intangible property that results from creative mental work, such as an invention, design, idea, method, name, or symbol.

Dr. P. Ramakrishnam Raju, gave a Seminar on “RESEARCH METHODOLOGY AND STATISTICAL ANALYSIS” on 09th July 2018 to the students of Life Sciences. He explains Statistical methods involved in carrying out a study include planning, designing, collecting data, analysing, drawing meaningful interpretation and reporting of the research findings. The statistical analysis gives meaning to the meaningless numbers, thereby breathing life into a lifeless data. High-quality statistical analysis in research is vital to making it clear what the importance of the research is and helping future researchers build on your work. It can also make it easier for laypersons to understand the significance of complex academic research.
